

A Winter Mad Lib

It was the middle of winter and overnight [1_____] inches of snow had fallen outside. [2_____] was so excited that they called [3_____] and [4_____] and invited them over for some winter fun.

When they arrived, [2_____] was [5_____] to see that they had brought their good snow [6_____]. "I really want to build the most [7_____] snowman," said [4_____]. So they went outside and started to build their masterpiece. [2_____] placed two [8_____] for the eyes and [3_____] put a long [9_____] for the nose. Finally, [4_____] placed little [10_____] to make a mouth. "It's absolutely [11_____]!" said [2_____].

[3_____] suggested that they go to the park and go sledding. "But we don't have a sled?" said [2_____]. [4_____], the smart one of the group, said, "Don't worry, instead of a regular sled we can use a/an [12_____] instead." So off they went, and they sat on their makeshift sled together and counted to [13_____] before they slid down the hill. "[14_____]!" yelled [3_____] as they flew down to the bottom.

After a long day in the snow, they went back to [2_____]'s house and had one of [2_____]'s famous hot chocolates. Whereas most people would have marshmallows, [2_____] instead added two small [15_____] to float at the top. "Those [15_____] taste [16_____]! I wish I could have [17_____] more!"

As they looked outside at their beautiful snowman, they thought about just what an [18_____] winter's day it had been.
