

Science Mad Lib

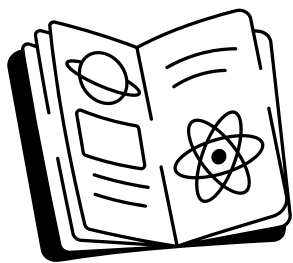

Science class is [1_____]'s [2_____] because they do [3_____] experiments every day. The first one today was [4_____] toothpaste, it's like elephant toothpaste, but instead of yeast, you add dried [5_____]. It creates a/an [6_____] reaction and it will then start to [7_____].

Next was observing the reaction between baking soda and [8_____]. It can be dangerous as it can result in acidic [9_____], so it is important to put a [10_____] over your eyes to protect them.

If during an experiment you ever get [11_____] on you, it can cause you to [12_____] [13_____]. [14_____] is very clever and he/she always recommends using [15_____] on your hands when experimenting with tiny [16_____].

Another experiment was the homemade rocket. To make it, all you need is a/an [17_____], [18_____] [19_____], and a balloon filled with [20_____]. Then once you [21_____] on the pump, the air should travel through the [17_____] and propel the rocket almost [22_____] feet into the air.

Science is [23_____], but as [24_____] always says, "To be a good scientist, you have to always be [25_____] and [25_____]."
